About Our Bulls

Our bulls consist of:

- Red Angus PB & Composites
- Black Angus PB & Composites
- Black Simmental PB & Composites

We're proud of the fact these cattle are raised under commercial cowman standards.

- We don't calve early.
- We don't creep feed.
- We only feed hay at calving time.
- The cows are summered on grass & wintered on corn stalks.
- We EXPECT cows to raise a calf & breed back in 60 days or she is sold!

(Promotes STRONG fertility) + The right frame score & optimum growth & milk combination

What we do over & above anything else is to A.I. 300 cows using only well-proven bulls with accurate EPD's. This makes these bulls predictable in the traits YOU WANT.

We'd like to stress to you to match a bull that fits your cows. Keep heterosis working in your herd by cross breeding-this can be accomplished by using Hybrid or Purebreds, depending on your herd.

Thank you for choosing Weaver Ranches,
Brian & John Weaver
